# Peels

**Glycolic Acid** On the skin's surface, glycolic acid weakens the bonds that hold together dead skin cells, advancing their natural exfoliation from the surface and leaving behind new layers of clearer, smoother skin. Great for all skin types.

**30 min      \$50**

**30% Salicylic Acid** Works by softening the bonds that hold together dead skin cells on the top layers of the skin. Salicylic Acid's comedolytic (oil-dissolving) properties enable it to penetrate into clogged pores and break down any bacterial infections, dead skin cells or excess sebum which may be lodged inside a pore. Great for acne and some skin types.

**30 min      \$50**

**30% Lactic Acid** Having one of the largest molecules, penetration is much slower which results in less irritation to the skin. It works by loosening the glue like substance that bind skin cells together. Stimulate elastic fibers and promotes new collagen growth in the dermis layer of the skin. Great for sensitive skin and rosacea.

**30 min      \$50**

**Microdermabrasion** A skin-freshening technique that helps repair facial skin that takes a beating from the sun and the effects of aging. A mechanical process with diamond tips creates gentle abrasion with suction to remove the dead, outer layer of skin. As with other skin rejuvenation techniques, more than one treatment may be needed to reduce or remove fine wrinkles and unwanted pigmentation.

**30 min      \$50**

**Add any peel to any facial for just \$20**
